

How To Use the Application

Zoom ()

The Zoom widget allows you to zoom in or out to view the map in more or less detail.

Home ()

By clicking on the home widget, you can go back to the map's default extent.

Find My location ()

The Find My Location widget helps identify your current location and zooms the map to it when clicked.

Basemap Gallery ()

You can select a basemap from the Basemap Gallery by clicking the icon to expand and view all available options.

Layer List ()

The Layer List displays all map layers, allowing you to easily toggle each one on or off by clicking the eye icon.

Legend ()

This widget shows the legend of the map.

Bookmarks ()

To add bookmarks, start by zooming in to your desired location. Once you've positioned the map accordingly, open the bookmark menu and click on the Add button. This will save the current view as a bookmark for easy access later on.
